

## SAPA PRECISION TUBING

### TRAINEE PROGRAM

A training program in SAPA is a great way to try out and learn more about the field you have chosen for your studies. You will be obtaining a valuable experience and you will get to tackle real challenges, with support from experienced colleagues.

As a SAPA Precision Tubing (PT) trainee, you will take part in a unique and exciting 18 months development program. You will be based in several business areas or departments suitable for your studies, and get to take your learning into practice.

SAPA Precision Tubing has locations and trainee program opportunities in many countries on four continents. Each training opportunity is connected to SAPA purpose of shaping a sustainable future through innovative aluminum solutions.

Candidates accepted for SAPA PT Trainee Program will have an opportunity to spend 6 months at each plant or department according to the training program. The program will be based on actual needs and the candidate will have an exceptional occasion to learn many aspects of how modern manufacturing processes are realized and improved.

After 18 months of training and upon successful completion of the SAPA PT Trainee Program the participant will gain incomparable experience and opportunity to become a permanent member of SAPA community.

The SAPA PT Trainee position description along with skills required for the position and list of general responsibilities will be posted and advertised. We strongly encourage all candidates to carefully review posted information.
